4.2.1 - Library is automated using Integrated Library Management System (ILMS)

The Central Library of CKCET stands at the forefront of modernization, employing an advanced Integrated Library Management System known as My Class Board. This comprehensive ILMS seamlessly integrates, Library Maintenance, Circulation, and OPAC Modules, providing a well-rounded solution for efficient library operations.

The user management module supports the management of user profiles including students, staff and faculty. And it gives the personalized access for the library resources. Circulation modules manage the seamless flow of materials within the library, facilitating easy issue, return and renewal processes. The overdue or the fine module monitors the late returns and fines.

The ILMS, My Class Board offers the notification and alerts service to the user reminding resource due dates, overdue and the reservation items. The OPAC modules, marked by their user-friendly interface, redefine the user experience by simplifying access to library services. This digital oasis extends to real-time visitor registration, enhancing the library's responsiveness.

The reporting and analytical structure of this ILMS offer customization reports on the various aspects, namely circulation, users, and library resource statistics.

The ILMS My Class Board, revolutionizes the library landscape, offering a digital environment for both management and users. Its serials control and administration modules empower librarians to maintain a meticulous catalogue of resources. The result is a dynamic library system that not only embraces technological advancements but also prioritizes user accessibility, ultimately fostering a more enriching and efficient library experience for all stakeholders.
